

edgeConnect v4.5 Presentation Training Course

Duration: 1 Day

This course provides delegates with details of the presentation editor in the edgeConnect graphical development environment. By the end of the course, delegates will be able to control layout of edgeConnect pages, add and edit designs and create and edit styles using the Style editor.

During the course, delegates will work on practical exercises based on real life examples.

Who should attend?

Anyone who requires the knowledge to modify presentations in edgeConnect projects

Pre-Requisites

- Course attendees do not need to have attended any other edgeConnect courses.
- The course assumes an understanding of IT. Users should be familiar with using a mouse and keyboard in the Windows environment.
- An understanding of web browsers and working on the internet is also required

Course Objectives

At the end of the course the successful delegate will be able to:
